

News Alert

Now available: new Joystick handles

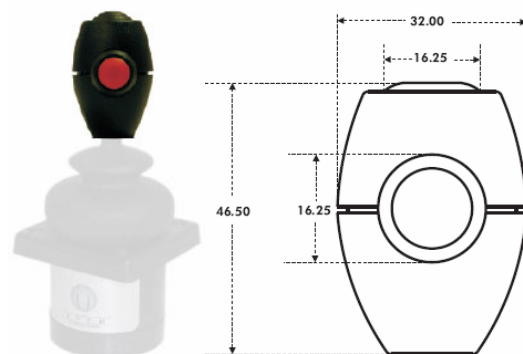

The array of APEM Joysticks handles keeps expanding: APEM UK introduces **11 new models**. Today, the new handle selection guide offers 26 references with several shapes, colors, materials and finishes. Some models integrate one or several pushbuttons or a rocker switch. Stainless Steel material is also introduced. Few examples of new handle models are shown below.

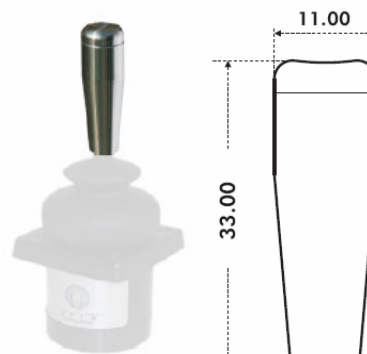

Handle L and AC
Left and right tactile
momentary IS series switches

Handle AE
Rocker switch handle with a
Left & right rocking action
TR series switch

Handle X
Multifunctional handle with 2 momentary
IS series switches
(one on top & one on the front)

Handle AH
A small modern-looking stainless
steel handle with a polished finish

This increasingly wider offer proves APEM's capacity to meet customer needs for Joysticks. Don't hesitate to contact APEM UK for new requirements.
