New KR locking rocker

Available in June 07: KR range extension

APEM SA developed for a tractor manufacturer a new product in the KR series: a locking rocker.

It will be sold as a standard, not a custom product.

This product integrates well into the current KR series, thanks to design studies.

Different versions are available:

- 2 terminal types (6,35x0,8 mm and 2,8x0,8 mm)
- 2 or 3 positions
- 1 locked position
- Patented: an ergonomic and intuitive unlock
- 1 symbol can be illuminated (see opposite drawings)
- Protective frame (against impacts and inadvertent actuation)

1 Locked position

Symbol illumination option

This product has 8-10 terminals. All 8-10 versions (classical and this locking version will be available in June 07).
