

DURABLE, DEPENDABLE AND RUGGED

Outdoor, exposed or unsupervised access control systems, ticketing and unattended payment systems can be subjected to vandalism, water, dust and shocks.

APEM offers field proven durable, dependable and rugged HMI solutions designed for this urban environment as well as CCTV camera controllers.

Typical applications: CCTV control, access control systems, door openers, vending machines, kiosks, ticketing, self rental stations, banking ATM, payment systems, public lifts, emergency roadside telephone, security equipment in public transportation...

DISCOVER WHAT MAKES APEM A STRONG CONTRIBUTOR IN THE HMI MARKET.

ROBUST

The standard use of resistant materials like stainless steel or flame-retardant plastics and robust contact anti-jamming mechanisms ensure the durability of our products and a robustness up to IK10.

APPEALING AESTHETICS

Every detail is considered to improve the visibility and accessibility of our interface solutions: choice of materials, shapes, specific marking, high brightness illumination and uniform backlighting.

CUSTOM PRODUCTS

APEM offers our unique HMI customization capabilities to our customers. Our strong development and design processes based on the automotive APQP method, facilitates a cohesive collaboration with our customers.

PLUG&PLAY

APEM is a leader in PTZ controllers used to control CCTV cameras in buildings, vehicles and on-board UAV. Our plug&play USB controllers are easy to customize to perfectly match your need.
