### **MATERIALS**

• Case : diallylphthalate (DAP)

• Actuator : brass, nickel plated

· Bushing: brass, nickel plated

• Housing : brass, nickel plated

• Contacts :

A: silver

AD2: silver, gold plated (2 micron gold)

CD: brass, gold plated

• Terminal seal: epoxy

APEM products may be recycled at end-of-life for the re-claiming of valuable metal components.

Note: AD2 contacts can be used for high level applications. In this case, the gold layer is considered only as a protection against oxidation during storage.

### **RELIABILITY - RUN-IN TEST**

Upon request, each individual switch can be submitted to a low level run-in test of 50 or 250 cycles to ensure suitability for special applications requiring a very high level of reliability (military, space,etc.).
