APEM Italia offers a range of security keyboards mounted on printed circuits, equipped with stainless steel front face and keys. This range consists of three product series featuring different security levels and key travel.

The Company proposes numeric or alphanumeric keypads and keyboards, and specific products with a large choice of options : backlighting, heating, display windows, specific markings, Braille alphabet, associated electronics, trackball...

The products are manufactured at Marene, in the North of Italy, in an ISO 9001 certified plant.

APEM Italia is a manufacturing and sales subsidiary of the APEM Group, one of the world's largest manufacturers of switches and switch panels.

STAINLESS STEEL KEYBOARDS

These keyboards are suitable for applications in harsh environments. Their construction and the materials used allow them to withstand extreme climatic conditions or vandalism. Moreover, chemical or laser engraving of characters provide excellent resistance to wearing off.

All the keyboards of the range feature tactile feedback and IP 65 front panel sealing.

FOR HARSH ENVIRONMENTS

recommended applications

Access control

For resistance to vandalism: residential controllers, car park entries, tolls, securitized rooms, lifts...

Interactive information kiosks

For resistance to intensive use in the street or in public places: internet kiosks, hotel reservation kiosks, train/planes schedule information kiosks...

Food, pharmaceutical and medical industry

For reliability and hygiene: medical equipment, instrumentation...

Harbor and marine equipment

For resistance to salt spray: harbor engines, boat control boards...

Military applications

For ruggedness and resistance to EMI: vehicles, communication interfaces...

ATM's

For resistance to vandalism and intensive use: ATM's for bank notes, transport tickets...

9 SERIES "HIGH SECURITY"

standard or specific models

— **Vandal proof**

— **Chemical key engraving**

— **Excellent EMI resistance**

— **Intensive use: 3 million operations**

— **Stainless steel thickness: 2.5 mm to 4 mm**

— **IP 65 front of panel sealing (IEC 529)**

— **Interface on request, with or without encoding**

mechanical specifications

Contact force:	2.5 to 4 N
Contact travel:	0.5 mm
Number of operations:	3×10^6
Sealing:	IP 65
Trackball:	IP 65 static
Marking	chemical engraving

electrical specifications

Nominal voltage:	24 V
Max. power:	2 W
Contact resistance:	< 10 ohms
Dielectric strength:	250 V
Insulation resistance:	> 100 M ohms

climatic specifications

Operating temperature:	-20°C to +70°C
With standard interface:	0°C to +70°C
With specific interface:	-20°C to +70°C
Storage temperature:	-40°C to +85°C

STANDARD KEYPADS & KEYBOARDS

4 keys

T09 004 00 03 000

T09 004 00 04 000

T09 004 00 02 000

12 and 16 keys

12 keys

T09 012 00 03 001

16 keys

T09 016 00 03 002

12 keys

T09 012 00 01 001

16 keys

T09 016 00 01 002

alphanumeric

55 keys

T09 055 00 03 QWO

55 keys with trackball

T09 055 02 03 AZO

74 keys with trackball

T09 074 01 03 QWO

Available in AZERTY, QWERTY or QWERTZ versions

SPECIFIC KEYBOARDS

Specific customized keyboards can also be developed: with display windows, Braille alphabet, backlighting, heated for cold weather environment, color engraving...

APEM Italia

Series 82

GENERAL OVERVIEW

- Round keys diam. 14mm, with AISI316L stainless steel keytops, and custom marking layout chemically engraved
- Switching by stainless steel dome (50mA)
- Rear panel mounting
- AISI304 stainless steel front frame, • 2.5mm
- IP65, IK07 (impact resistance 6 joules)

Hairdersers seats control

Domotic remote control

Access control

PRODUCT SPECIFICATION

Technical Characteristics

“serie 8” Keyboards

Construction:

Front Panel	Stainless Steel AISI 316 L 2 mm (Punched and brushed / grain 220)
Keys	ABS / PA6 Nylon (back light versions) → U.L.V0.
Key tops	Stainless steel AISI 316 L 0,5 mm (Chem. Etch. and brushed / grain 220)
Support	CEM1 / FR4 (back light versions) Printed Circuit Board 1,6/2 mm U.L.V0.
Key Holder/Spacer	ABS / Polycarbonate 2 mm → U.L.V0.
Sealing	Silicon sheet 0,5 mm on PCB + Neoprene O-Ring on front face.
Contacts	St. St. Snap Domes 12 mm.
Connecting	Standard codes with 10 Ways Ribbon male straight header.

Mechanical and Electrical Characteristic:

Actuator type	Stainless Steel Snap Domes AISI 304 Diam. 12 mm.
Contact force	4 N ± 0,5 N (3,5 N ± 0,5 N for Back Light versions)
Stroke	0,5 mm
Contact resistance	< 10 ohm (Gold plated PCB), - < 200 ohm (Graphite contact)
Contact Bounce	< 0,5 mS (On), < 6 mS (Off)
Peak current	50 mA (Gold plated PCB) - 20 mA (Graphite contact)
Insulation resistance	> 1Gohm (@ 500 V)
Power Max.	1,2 W at 24 Vcc - 0,5 W at 24 Vcc (Graphite contact)
No. of transitions	> 1 x 10 ⁶
Back lighting (Option)	1 LED with limit resistor (5Vcc or 12Vcc - 24Vdc on request)

Environmental conditions:

Operating temperature	- 20 ÷ + 70 °C
Storage temperature	- 40 ÷ + 85 °C (-30 °C for Back light versions)
Relative humidity	5 ÷ 95 % RH (With no condensation)
Frontal protection	IP 66
Frontal protection (trackball version)	IP 65 (not moving the trackball) IP 54 (moving the trackball)

PRODUCT SPECIFICATION

Technical Characteristics

“serie 8” Keyboards

OTHER PHYSICAL AND MECHANICAL PROPERTIES

- **PROTECTION AGAINST SOLID BODIES:** Level 6 according with NF C20-010
- **PROTECTION AGAINST LIQUIDS:** Level 6 according with NF C 20-010 (on front side without trackball).
- **MECHANICAL PROTECTION:** Level IK 7 (according with NF C 20-010 (frontal impact force = 2,00 joules).
- **WASHABILITY:** Resistant to most common-use detergents and several solvents.
- **ABRADABILITY:** Very good, because characters on the keys are realized using painting (Epoxy Bi-Component Resin) deposited in a 250 µm Chemical Etching.
- **DUST RESISTANCE:** On front side up to fine dust (talc).
- **FLAME RESISTANCE:** 30 sec. with lighters, matches, cigarettes (vertical pos. with direct flame on the keys).
- **SALT FOG RESISTANCE:** 96H AT +35°C NaCL 5% (on front side after assembling).

PROTECTION IS NOT GUARANTEED AGAINST:

- SPECIAL ACIDS OR SOLVENTS.
- RESINS, PAINTS OR SURFACE HARDENING TREATMENTS.

7 SERIES "SECURITY"

standard or specific models

- **Good security level**
- **Laser key engraving**
- **Flush keys**
- **IP 65 front of panel sealing**
- **Stainless steel thickness: 2 mm**
- **PS2 standard interface**

mechanical specifications

Contact force:	4 N +/- 0,5 N
Contact travel:	0.5 mm
Number of operations:	1 x 10 ⁶
Sealing:	IP 65
Trackball:	IP 65 static
Marking:	laser

electrical specifications

On specifications, APEM Italia also develops and produces specific models based on the technology of the 7 series.

70 SERIES

"SECURITY AND LONG TRAVEL"

particularly suitable for interactive kiosks

— **Keyboards for rapid data entry**

— **Alphanumeric models**

— **Stainless steel thickness: 2 mm**

— **AZERTY, QWERTY or QWERTZ versions, with or without trackball**

— **Optional key customization**

— **PS2 standard interface**

specific mechanical specifications of the 70 series

Contact force:	1.5 N +/- 20%
Contact travel:	1.3 mm
Number of operations:	1 x 10 ⁶

specific electrical specifications of the 70 series

Nominal voltage:	12 V
Max. power:	1 W

The other specifications are the same
as those of the 7 series
