# SCOLMORE

International Limited

### About Scolmore

Since our incorporation in 1989 we have become a significant force in the power cord and electrical accessories market. We're proud to be a British based, family-run business, with an excellent track record of listening to what our customers need and providing the right solution every time.

### Central Location

Based in the Midlands at our purpose built 100,000sq ft Head Office and Distribution Centre, we are ideally located to design, develop, manufacture and distribute our ever-expanding product range worldwide.

### The Home of Scolmore

We are committed to providing a comprehensive range of reliable, high quality and competitively priced products to our customers, whilst also offering a bespoke design and manufacture service to ensure we provide exactly the right solution and product for any installation or project. We're proud to say our customers can trust Scolmore to get the job done!

### Delivering New Products

Our New Product Development Team are constantly tracking market trends, approval standards and providing customised products according to unique specification. This insures we continue to increase our product range to meet the ever-changing needs of our customers.

### A People Business

Scolmore International is a Company that revolves around people – our team, our customers and the strong relationships we build and maintain through our consistent high levels of service and delivery.

MD, Gary Mordue strongly believes the dedication and skills of his team have contributed to the continuing success of Scolmore:

"The Company is very much built on people. Each individual makes a unique contribution to the business and its customers. The professionalism, skills and knowledge of our team throughout the business allow us to deliver every customer the product they need, when they need it, high quality at the best price."

## Working harder for you

Solutions to your problems

We are proud of our hard earned reputation of being a flexible and responsive partner in our dealings with a host of UK and International electrical distributors and original equipment manufacturers. Outside of the UK and Ireland, Click products are available worldwide where there is a need for innovative, high quality products.

At Scolmore, we know that every project has different challenges, and the right solution isn't always available. Should this be found not to be the case our promise is that we will be happy to listen to our customers and work with them to devise a solution to their particular needs.

Our expert team are able to develop exactly the right product by listening to you. We will innovate, research and develop to ensure our solution solves your problems.

## Power Cord Solutions

Products designed with you in mind

Scolmore International have been Developing, manufacturing and specifying Power cords for 20 years and have a comprehensive range of products to suit most requirements with stock lines being available from our 100,000 sq ft warehouse in Tamworth.

All power cords are rigorously tested and are fully certified with the relevant test documentation.

We are also able to offer bespoke power cords.

Fully Compliant with the major international standards, all our cables are significantly tested and fully certified with test documents.

Guards against accidental disconnection of computers, servers and most electrical appliances.

- Designed to help prevent accidental disconnection of computer equipment and servers containing valuable data
- Suitable to prevent vulnerable appliances becoming disconnected due to vibration
- Suitable for various Data Communications applications that require a secure power source
- Loose coiled (Un-hanked) to avoid any permanent cable memory and ensure tidy installation

- Unique 'patented' Female C13 connector 'IEC Lock™'
- IEC Lock™ C13 available to UK 13amp Plug, Right angled Schuko (European) plug, NEMA 5-15P (USA) plug, Australian Plug, C14 plug and Stripped End.
- Suitable for use with 'any' standard conforming IEC inlet
- IEC Lock™ C13 is currently available in Black, Orange, Blue and White in various specifications.

## Ideal for use with:

Data Centers

Military

Maritime

Outside Broadcasting

Medical

## Technical Information

300mm up to any length. Various cables lengths and assemblies are retained as stock items with further combinations being available for special order. Call our Sales Office for more information.

### Cable Size

3 x 1.00mm<sup>2</sup> H05 VV-F,  
3 x 16, 3 x 18awg SVT / SJT  
Black, Orange, Blue, Grey, White

### Test Information

Test Body: KEMA, UL, SAA  
Test Standard: IEC/EN 60320-1

### Patent Information

Patents: U.K. Patent  
No. GB2383202B  
International Patent application  
No. PCT/GB02/05714

## How it works!

- Push the connector into the standard IEC inlet and it is locked in position
- Connector CANNOT be accidentally pulled or vibrated out of the inlet
- Slide back the 'red' tab to release and remove connector from inlet
