

Variable Flow Pumps

New!

#700 Series Gear Pumps

- ▶ Maximum flow rate 3000 ml/min
- ▶ Adjustable speed
- ▶ Self-priming
- ▶ Reversible
- ▶ Thermal overload protection

Applications:

- ▶ coffee machines
- ▶ beverage dispensing

Johnson Electric's new #700 series gear pump offers high precision and variable flow control capability to suit the wide range of requirements for liquid pump dispensing. Our products are designed, built, tested, packaged, and shipped to your exact specifications.

We appreciate the opportunity to collaboratively work with your design teams early in the development cycle of the application. We can respond to requirements quickly by networking our know-how across the global Johnson Electric organization and at the same time providing local support to increase efficiency, reduce costs and to streamline application development cycles. Technical

#700 Series Gear Pumps

Max Flow Rate	3000 ml/min
Max Discharge Pressure	100 PSI (7 Bar)
Media Temperature	10 - 60 °C
Inlet / Outlet Port OD	6 mm
Weight	500 g
Dimensions (l x w x h)	58 x 68 x 107 mm
Input Power	30 - 100 W
Media Type	liquids, water, high viscosity fluids
Other Features	adjustable speed reversible sanitary self-priming
Optional Feature	thermal overload protection

Supply 24 VDC

Supply 120 VAC(60Hz) / 240 VAC (50 Hz)
