Think Automation and beyond...

IDEC

New
ø22mm XW Series
Emergency Stop Switches
(Mechanical Indicator)

Normal/latched status can be checked from a distance with the mechanical indicator function.
The smooth ridge-less button prevents dust build-up and assures comfortable operation.

The operator body
shows the button status
(normal/latched)

Mechanical Indicator

Smooth and ridge-less button
surface prevents dust build-up.

Degree of protection:
IP65 (waterproof)

Illuminated model
also available.

When the switch is damaged due to excessive
shocks, the NC contacts will turn off, stopping
the machine (Reverse Energy Structure).

XW Series

Excellent safety mechanisms including a mechanical indicator that shows contact status.

The safety mechanism ensures the XW contacts open (safe) even when damaged by excessive shocks (reverse energy structure, safe break action).

(Actual Size)

Non-illuminated	Illuminated

The smooth and ridge-free button surface prevents dust build-up, and is also easy to clearn. Ideal for applications such as food processing machines.

Mechanical Indicator – the operator body of the switch is green when the contacts are closed, the green is hidden when the switch is actuated.
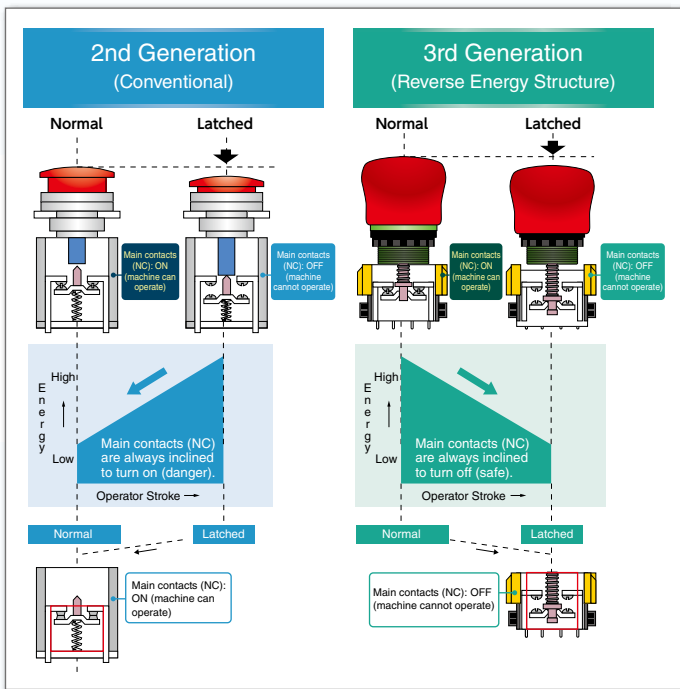

IDEC's sleek, smooth design reduces operator's stress and fatigue.

NC contacts ON (button not pressed)

NC contacts OFF (button latched)

Safety for operators, machines and systems

Reverse Energy Structure

With XW series emergency stop switches, the potential energy level of the latched status is lower than that of the normal status. When the switch is damaged due to excessive shocks, the NC contacts will turn off, thus stopping the machine (patented design).

2nd Generation (Conventional)	3rd Generation (Reverse Energy Structure)

2nd Generation (Conventional)

Normal | Latched

Main contacts (NC): ON (machine can operate) / Main contacts (NC): OFF (machine cannot operate)

Energy High → Low
Main contacts (NC) are always inclined to turn on (danger).
Operator Stroke →

Normal | Latched

Main contacts (NC): ON (machine can operate)

3rd Generation (Reverse Energy Structure)

Normal | Latched

Main contacts (NC): ON (machine can operate) / Main contacts (NC): OFF (machine cannot operate)

Energy High → Low
Main contacts (NC) are always inclined to turn off (safe).
Operator Stroke →

Normal | Latched

Main contacts (NC): OFF (machine cannot operate)

Safe Break Action

When the contact block is detached from the operator, the NC contact opens (OFF).

Operator

Contact Block

1 2 3 4

Closed ON

Open OFF
When the contact block is detached from the operator, the cam directly opens the NC main contacts (contacts are off).

Resetting

XW series can be reset easily either by pulling or turning.

Pull | Turn

Complies with International Standards

Safety Lock Mechanism

The emergency stop signal shall be maintained until the emergency stop device is reset (disengaged). (IEC 60947-5-5; 6.2)

Complies to international safety standards

UL LISTED — EMERGENCY STOP DEVICE

c UL us LISTED

TÜV   C E   CCC s

Direct Opening Action →

All normally closed contact elements of an emergency stop devices shall have a direct opening action (positive opening action), according to annex K of IEC 60947-5-1. (IEC 60947-5-5; 5.2)

(13/04/04)

High level of safety with Safe Break Action. Mechanical indicator on the operator body shows the contact status - green when NC contacts are closed - reducing the maintenance work.

- IDEC's original "Safe Break Action" and "Reverse Energy Structure" ensure the safety of operator and system, when the switch is damaged due to excessive shocks.
- The mechanical indicator on the operator body shows the normal/latched status (green: normal). Reduces maintenance work and improves operation efficiency.
- Illuminated model also available (same size as non-illuminated)
- The depth behind the panel is only 46.4 mm (w/terminal cover).
- 1 to 4NC main contacts and 1 or 2NO monitor contact
- Push-to-lock, Pull or Turn-to-reset operator
- Direct opening action mechanism
  (IEC 60947-5-5, 5.2, IEC 60947-5-1, Annex K)
- Safety lock mechanism (IEC 60947-5-5, 6.2)
- Degree of protection: IP65 (IEC 60529)
- Durable gold-plated contacts
- Finger-safe structure (IP20)
- UL, c-UL listed. EN compliant.
- UL NISD category

Contact Ratings
(NC main contacts/NO monitor contact)

Rated Insulation Voltage (Ui)			Screw Terminal	250V	
Rated Thermal Current (Ith)				5A	
Rated Operating Voltage (Ue)			30V	125V	250V
Rated Operating Current	Main Contacts	AC 50/60 Hz	Resistive Load (AC-12)	–	5A	3A
			Inductive Load (AC-15)	–	3A	1.5A
		DC	Resistive Load (DC-12)	2A	0.4A	0.2A
			Inductive Load (DC-13)	1A	0.22A	0.1A
	Monitor Contacts	AC 50/60 Hz	Resistive Load (AC-12)	–	1.2A	0.6A
			Inductive Load (AC-14)	–	0.6A	0.3A
		DC	Resistive Load (DC-12)	2A	0.4A	0.2A
			Inductive Load (DC-13)	1A	0.22A	0.1A

- Minimum applicable load: 5V AC/DC, 1 mA (reference value)
  (Operating area depends on the operating conditions and load types.)
- The rated operating currents are measured at resistive/inductive load types specified in JIS C8201-5-1.

Illumination Ratings

Rated Voltage	Operating Voltage	Rated Current
24V AC/DC	24V AC/DC ±10%	15 mA

Note: An LED lamp is built into the contact block and cannot be replaced.

Specifications

Applicable Standards	IEC60947-5-5, EN60947-5-5 JIS C8201-5-1, UL508, UL991, NFPA79, CSA C22.2 No. 14, GB14048.5
Operating Temperature	Non-illuminated: –25 to +60°C (no freezing) LED illuminated: –25 to +55°C (no freezing)
Storage Temperature	–45 to +80°C (no freezing)
Operating Humidity	45 to 85% RH (no condensation)
Operating Force	Push to lock: 32N Pull to reset: 21N Turn to reset: 0.27 N·m
Minimum Force Required for Direct Opening Action	80N
Minimum Operator Stroke Required for Direct Opening Action	4.0 mm
Maximum Operator Stroke	4.5 mm
Contact Resistance	50 mΩ maximum (initial value)
Insulation Resistance	100 MΩ minimum (500V DC megger)
Overvoltage Category	II
Impulse Withstand Voltage	2.5 kV
Pollution Degree	3
Operation Frequency	900 operations/hour
Shock Resistance	Operating extremes: 150 m/s^2 Damage limits: 1000 m/s^2
Vibration Resistance	Operating extremes:10 to 500 Hz, amplitude 0.35 mm, acceleration 50 m/s^2 Damage limits: 10 to 500 Hz, amplitude 0.35 mm, acceleration 50 m/s^2
Mechanical Life	250,000 operations minimum
Electrical Life	100,000 operations minimum 250,000 operations minimum (24V AC/DC, 100 mA)
Degree of Protection	Panel front: IP65 (IEC 60529) Terminal Protection: IP20 (screw terminal, when using XW9Z-VL2MF)
Short-circuit Protection	250V/10A fuse (Type aM, IEC60269-1/IEC60269-2)
Conditional Short-circuit Current	1000A
Terminal Style	M3 screw terminal
Recommended Tightening Torque for Locking Ring	2.0 N·m
Connectable Wire	0.75 to 1.25 mm^2 (AWG18 to 16)
Recommended Tightening Torque for Terminal Screw	0.6 to 1.0 N·m

Mechanical Indicator Model

Non-illuminated Pushlock Pull/Turn Reset (Screw Terminal)

Package quantity: 1

Dimensions

Nameplate for ø38/40 Button

• Panel thickness when using the nameplate: 1.0 to 2.5 mm
All dimensions in mm.

⚠ Safety Precautions

• Turn off power to the XW series emergency stop switch before starting installation, removal, wiring, maintenance, and inspection of the relays. Failure to turn power off may cause electrical shock or fire hazard.

• For wiring, use wires of the proper size to meet the voltage and current requirements. Tighten the M3 terminal screw to a tightening torque of 0.6 to 1.0 N·m. Failure to tighten the terminal screws may cause overheating and fire.

Instructions

Removing the Contact Block

First unlock the operator button. Grab the bayonet ring ① and pull back the bayonet ring until the latch pin clicks ②, then turn the contact block counterclockwise and pull out ③.

Notes for removing the contact block
1. When the contact block is removed, the monitor contact (NO contact) is closed.
2. While removing the contact block, do not exert excessive force, otherwise the switch may be damaged.
3. An LED lamp is built into the contact block for illuminated pushbuttons. When removing the contact block, pull the contact block straight to prevent damage to the LED lamp. If excessive force is exerted, the LED lamp may be damaged and fail to light.

Panel Mounting

Remove the locking ring from the operator. Insert the operator from panel front into the panel hole. Face the side without thread on the operator with TOP marking upward, and tighten the locking ring using ring wrench MW9Z-T1 to a torque of 2.0 N·m maximum.

Installing the Contact Block

First unlock the operator button. Align the small ▼ marking on the edge of the operator with the small ▲ marking on the yellow bayonet ring. Hold the contact block, not the bayonet ring. Press the contact block onto the operator and turn the contact block clockwise until the bayonet ring clicks.
Notes for installing the contact block
Make sure that the bayonet ring is in the locked position. Check that the two projections on the bayonet ring are securely in place.

Instructions

Wiring

1. Wire thickness: 0.75 to 1.25 mm² (AWG18 to 16)

Applicable Crimping Terminals　　　　**Solid Wire**

Ring Terminal　　　**Spade Terminal**

ø6.0 max.　ø3.2 min.　4.7 min.

6.0 max.　3.2 min.　3.0 max.　4.7 to 5.9

ø1.2 max.　6.2 max.

- Only solid wires can be used on the IP20 fingersafe terminal type.

Crimping Terminal　Insulating Tube　4.7 to 5.9　Wire

Crimping Terminal　Insulating Tube　4.7 to 5.9　Wire

- Be sure to install an insulating tube on the crimping terminal.
2. Tighten the M3 terminal screw to a tightening torque of 0.6 to 1.0 N·m.

Installing & Removing Terminal Covers

XW9Z-VL2M

To install the terminal cover, align the TOP marking on the terminal cover with the TOP marking on the contact block. Place the two projections on the bottom side of the contact block into the slots in the terminal cover. Press the terminal cover toward the contact block.

TOP marking

② Press the terminal cover

① Place the projections onto the contact block.
To remove the terminal cover, pull out the two latches on the top side of the terminal cover. Do not exert excessive force to the latches, otherwise the latches may break.

TOP markings

Pull out the latches.
IP20 Protection Terminal Cover XW9Z-VL2MF

To install the IP20 protection cover, align the TOP marking on the cover with the TOP marking on the contact block, and press the cover toward the contact block.

TOP marking

(Press)

TOP marking
Notes:
1. Once installed, the XW9Z-VL2MF cannot be removed.
2. The XW9Z-VL2MF cannot be installed after wiring.
3. With the XW9Z-VL2MF installed, crimping terminals cannot be used. Use solid wires.
4. Make sure that the XW9Z-VL2MF is securely installed. IP20 cannot be achieved when installed loosely, and electric shocks may occur.

Contact Bounce

When the button is reset by pulling or turning, the NC main contacts will bounce. When pressing the button, the NO monitor contacts will bounce.
When designing a control circuit, take the contact bounce time into consideration (reference value: 20 ms).

LED Illuminated Switches

An LED lamp is built into the contact block and cannot be replaced.

Nameplate

When anti-rotation is not required, remove the projection from the nameplate or switch guard using pliers.

Projection

Nameplate

Handling

Do not expose the switch to excessive shocks and vibrations, otherwise the switch may be deformed or damaged, causing malfunction or operation failure.
Specifications and other descriptions in this catalog are subject to change without notice.
