

PIC GmbH - E-BIKE SENSORS

We have been developing and producing speed sensors and magnetic solutions for the bicycle and e-bike industry for more than 20 years. Custom design solutions, the highest quality standards and same time cost-efficient production in our factories in Asia are the top priorities for us and our customers.

CUSTOMIZED SPEED AND BRAKE SENSORS FOR BICYCLES AND E-BIKES

The solutions shown on this page are already available - we develop individual projects together with our customers!

PIC E-Bike Sensor advantages:

Customer specific design

Matching spoke/disc brake Magnets from a single source

Individual cable and connector assembly

Highest industrial quality standards

OUR E-BIKE SENSORS AT A GLANCE:

E-Bike Sensors
MS-1627E

Standard E-Bike Sensor

E-Bike Sensors
MS-216E

Tubular E-Bike Sensor

E-Bike Sensors
MS-328E

Flatpack E-Bike Sensor

E-Bike Sensors
MS-332E

Flatpack E-Bike Sensor

E-Bike Sensor

MS-1627E

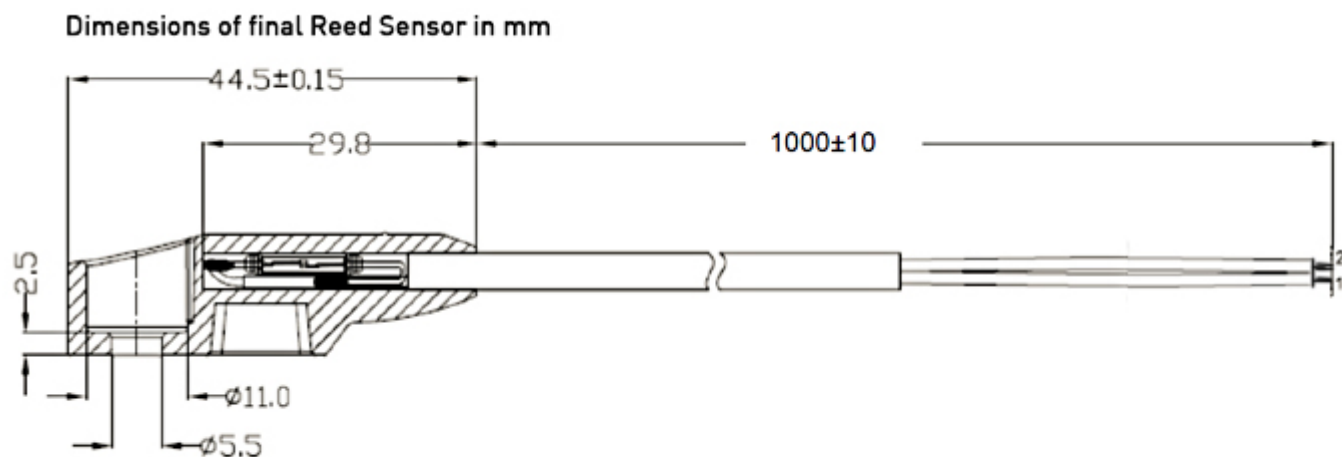

Standard E-Bike Sensor

Features:

- One-screw chainstay mounting
- Individual cable length
- Customized cable/connector assembly

Drawing:

Approval: RoHS / REACH / IP 67

Typical application: Speed Measuring (RPM)

E-Bike Sensors

MS-216E

Tubular E-Bike Sensor

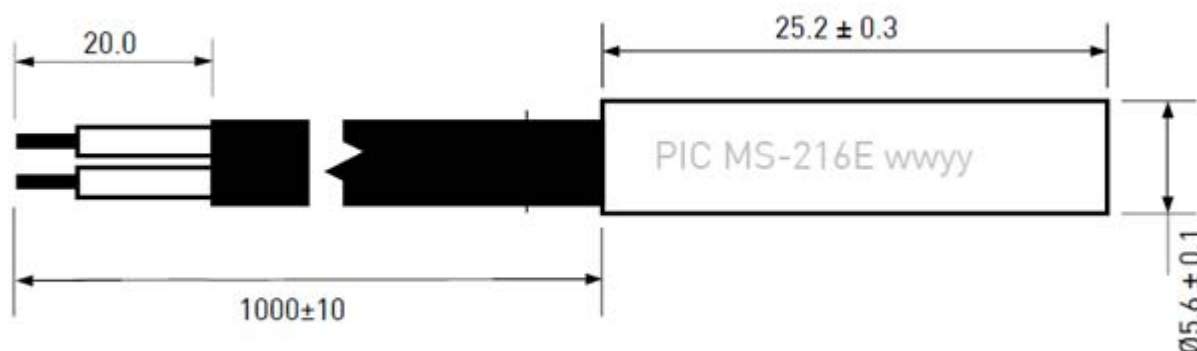

Features:

Assembly on bike frame via individualized clip
Customized cable/connector assembly

Drawing:

Dimensions in mm

Approval: RoHS / REACH / IP 67

Typical application: Speed Measuring (RPM)

Matching product: SM115153

E-Bike Sensors

MS-328E

Flatpack E-Bike Sensor

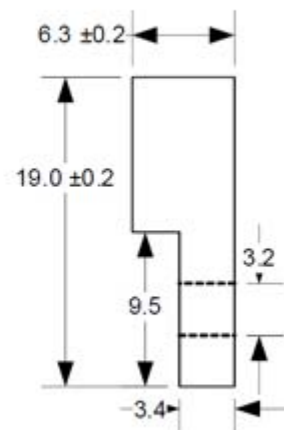

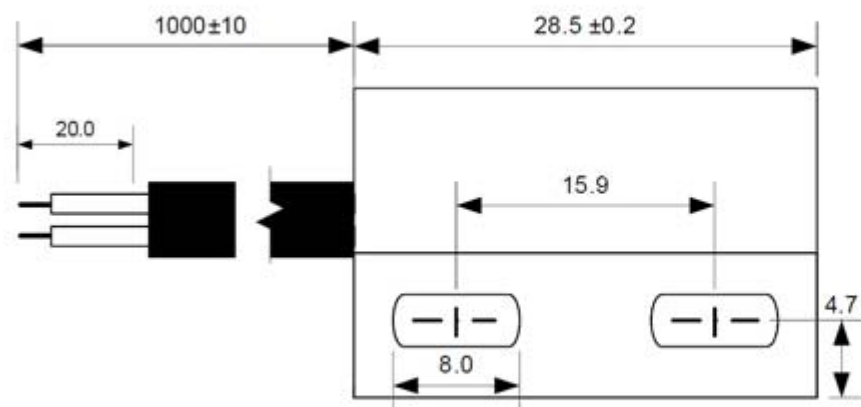

Features:

- For chainstay mounting
- Individual cable length
- Customized cable/connector assembly

Drawing:

Dimensions in mm

Approval: RoHS / REACH / IP 67

Typical application: Speed Measuring (RPM)

Matching product: SM115153
